

DEAR Judge FEVERSTEIN,

7-23-08

<sup>1st</sup> I want to thank you for your time on the 17<sup>th</sup> of this month and hearing my bail packet. For the past 6 months I have been trying to get bail yet however, because of my health issues, my health condition is in the worst condition it has ever been in.

During the bail hearing ~~and the question~~ you asked about my health, I understood that you do not know how severe or deadly "Sickle Cell Disease" could get.

Sickle Cell disease is a inherited disease only found in Afro Americans. Those living with the disease has abnormal red blood cells, that take the form of sickle causing the blood cells to get stucked together not able to carry oxygen thru out the body. When that happens it cause severe pain thru out the body, the back, joints, chest, all over.

If not treated in time the results most likely are death. The life expectancy for one with Sickle Cell is 30-35 years, that is if the body is well taken care of.

As you have here is how I will explain the type of pain we (sicklers) go thru when we have an attack. When Sickle Cell 1<sup>st</sup> got recognized as a serious disease the medical doctors was treating the pain with "Morphine". Now, that medication (morphine) is so strong that they give that to the war soldiers that has been shot or blown up missing limbs.

But since the early 21<sup>st</sup> century they stopped using morphine for sickness because it was not working for the pain so the doctors use a new medication called "diluted" that is 2<sup>nd</sup> as strong.

You know that's how painful ~~so~~ and deadly that Michel Bell is. I have been in so many scheduled comas in my life because <sup>TO HELP</sup> the pain got out of control and the only thing was to put me and a coma until it blew over.

~~He~~ <sup>When</sup> my lawyer requested for a bail, it was not so I can go home and be with my family or hang out with friends and party. A bail was fought for so I can better my health because my life is on the line.

This jail cannot accommodate my health at all and the longer I sit the worst it gets. Yes, I'm a criminal and can't be trusted but my lawyer has all my medical paperwork from years, decades ago and she also has my medical records for the time I'm here in jail. If you take a few minutes to look at them as well as the doctors notes you will see for yourself.

At my bail hearing you made a judgemental decision based on my criminal history, you a judge. But not one time at all you took the time to look at my medical history. But again you a judge not a doctor, and not at all was that

fore or equal, ~~what~~ you

My life is on the line ya however, I had this disease all my life since birth, I know it better than anyone. The way it's taking control of my life under these conditions.

When you denied my bail ya however, was like you giving me months to live. I'm already dying that's a fact at least ya however give me the chance to better my health so I'll have a better chance.

I'm not a rapist, killer, I was not stealing millions of dollars, I'm not a terrorist and I was not making millions of dollars off of drugs. I used a "phone" to buy illegal drugs. Please ya however just take a look at my medical records since I been incarcerated and you will see for yourself that under these conditions my health is going fast.

Even if you still don't consider bail at least you probably would send me to a better facility that would get my health under control.

ps. E. Maccadario is my attorney and I'm locked up with the Fresh Wilson org.

THANK YOU

Wahneema Lubiano

dear Rodney McGee, (Human Rights Com) date: 7-2-08

For the past few months i have been writting out vocalized issues on the medical problems im going thru while being housed at Nassau Jail as a federal inmate.

I am a inmate, who since birth has been diagnosed with a deadly disease called "Sichel Cell". Its a disease with a life span of 30+35 years. I treated well over 20 yrs to the age of 50+55 years.

One who has the disease most really take care of his health. Its a ~~difficult~~ <sup>DIFFICULT</sup> disease to monitor ~~especially~~ <sup>especially</sup> being locked up. And its a proven fact that Nassau Jail can not accomodate my medical needs.

I have been housed here for 13 months and since being here i been in the hospital 9 times a total of over 120 days. I have more sichel cell attacks while being here (Jail) than i would have if i were home. 1<sup>st</sup> the jail environment is a factor. The cold cells, the hard beds, not able to get fresh air as often as i should. 2<sup>nd</sup> the proper diet one with the disease should be on, im not. I have not got any fruit + juice since being here. The food & water here, 2<sup>nd</sup> i was hospitalized for bacteria growing in my blood. I stayed in the hospital for 3 weeks 2<sup>nd</sup> with a infection as anti-biotics thru the

IV for pickup. 3<sup>rd</sup> which is a major issue the amount of time it takes the jail to get me over to the hospital. The hospital is next door 2 minutes away but it always takes the jail 2 hrs or better to get me there. When one with sickle cell has a attack it's life threatening and very painful, so pain<sup>ful</sup> it can't be described.

Everytime i go thru a attack i think it's my last day on earth i sit for hrs and pain crying like a baby hoping <sup>EM</sup> to die just to feel relief. Not only am i hurting physically i hurt mentally as well. Seeing all the stuff just walking around laughing, sitting doing nothing while i wait crying for hrs, being tortured, in till transportation comes only to be handcuffed and shackled and thrown in the back of a hard cold van.

It tears me down mentally so many times i just wanted to take my own life rather than sit for hours in pain.

When home if i go thru a attack i get to the hospital within 10-15 minutes which is normal. It just ain't right how long the jail takes 2-3 hrs. It's against my rights as a human.

The 4<sup>th</sup> issue is i don't see the proper doc im supposed to be seeing monthly. I was

as special medication that helps limit the attacks i go thru. But once i came here they stopped it because while on the med. i get my blood monitored weekly because the med. could thin out my blood to much & kill me. But while here the jail was not monitoring my blood at all, and knowing that the med. i was taking could kill me you would think they (Jail) would. So my doctor at the hospital stopped the medication.

I'm just trying to reach out to everybody i can, to enlighten the world how im being treated with my medical issue over at a county jail as a federal inmate.

I'm also trying to get contact information for Gov. Patterson and Sen. H.R. Glimtas. And also im trying to retain a good lawyer to file a law suit against the staff & who ever else that comes involved with my health issues and just turn away. God forbid today is my last day and the reason be because my health. I have medical paperwork (my lawyer does) since birth that fills up a walk in closet from top to bottom on my health.

I wrote several waterized letters to my lawyer, my judge, my family, and now you and will continue to write untill my voice is heard.

or i get a bail to get home so i could get my health better. Because being locked up my health will only get worst.

THANK YOU

LOHAWTI HAREZII

ps. Also if you have contact information on Mr. Patterson or H.R. Clinton staff and also to checkel 12 views could you get it to me.
